The VERSA® 10 workstation is a compact and cost-effective automated liquid handling workstation designed to support various genomic workflows. The 4 or 8-channel pipetting head streamlines protocols while the single channel functionality offers the flexibility to perform complex liquid handling tasks.

Similar to all of Aurora's liquid handlers, the VERSA 10 Gene is an open system that supports the use of a board range of commercially available kits and various type of labware. This liquid handler is recognized for its exceptional accuracy, reproducibility, and throughput, which help to reduce reagent consumption, eliminate pipetting errors, and enhance laboratory productivity

Versa 10 Features

Compact, versatile
& economical design
allows for a small
lab footprint

Temperature regulation
module provides precise
temperature control for
reagents and samples

UV HEPA filtered
enclosure helps to
eliminate contami-
nation

Sample VERSA 10 DNA/RNA Purification Deck Layout

| VERSA 10 | Specifications |
|-------------------------|--|
| Volume | 1 µL to 250 µL (PCR Setup), 1 µL to 1000 µL(DNA/RNA Purification) |
| Deck Capacity | 6 deck positions for microtiter plates (supports both 96 and 384-well plates and includes adaptor to accommodate individual and/or 0.1 mL and up strip-tubes), deep well reservoirs and tip boxes |
| Pipetting Head | 4 or 8 channel syringe pipettor with single channel functionality |
| Plate Transporter | Moves plate from magnetic block to heater/shaker |
| Accessory Options | <ul style="list-style-type: none"> • Plate cooler / heater • Reagent cooler block • Shaker with or without integrated heater • HEPA/UV/Fluorescent light enclosure |
| Length x Depth x Height | 65 x 43 x 52 (cm) / 25.6 x 16.9 x 20.5 (in) |
| Weight | 27 kg / 59.5 lbs |
